The materials chosen for this type are

These are distended far beyond the subskirts and have a single wire or reed threaded through the hem to hold them in position. Bands of fur trim the extreme edge of the tunics and vary in width from two to ten inches.

Even frocks show a decided leaning toward the crinoline, for the skirts of transparent materials and heavy metallic brocades flare decidedly from the hips. These also are reinfored with wires or reeds and many are trimmed with narrow.

The bodice is a tightly fitted besque, sleekeless and unadorned, with a squarecut decolletage. To this is attached the skirt formed of four circular tiers, each one bound with a narrow biss band and stiffened with wire.

Her hair was sandy auburn, her eyelashes were colorless. She was flatchested and freckled, and she was dressed as simply as a milkmaid.

As might be supposed, this aspirant for dramatic honors was not at first successful. Her impediment in speech made acting practically impossible. In the present day of the cinema she might not have found this a stumbling block. However, she did the next best thing to becoming an actress—she married an actor. Once married Mrs. Inchbald began working with a determination seldom matched by any actress, and eventually she appeared as Cordella, playing to her husband's King Lear.
